

Arab Academy for Science and Technology and Maritime Transport
College of Computing and Information Technology

Course Title: Operating Systems Course Code: CS322
Lecturer : Dr. Mahmoud Ismail, Dr. Shaimaa Elmorsy, Dr. Yasmine Nagy
TAs: Mohammad Badawy, Sara Mohamed

Lab Project

Write a shell script file that:

- 1. Prompts the user** for the paths to their transcript PDF and the department's course plan PDF.
- 2. Assures the user** (implicitly) that they are responsible for obtaining their own transcripts and course plans.
- 3. Extracts** course information (code and grade) from the transcript PDF.
- 4. Extracts** course codes from the course plan PDF.
- 5. Creates a new file** with two sections:
 - a. **Completed Courses:** Lists courses with grades from the transcript.
 - b. **Courses to be Taken:** Lists courses from the course plan that are not found in the transcript.

Note: This script assumes the student has the necessary PDF files and understands that they are responsible for obtaining them (course plans are to be provided) .

Instructions:

Submission Deadline:

- The final submission is due **Tuesday on 12:00 a.m.**
- **Late submissions will not be accepted.**

Discussion Availability:

- A discussion will take place on **Tuesday during working hours.** we will be available starting at **9:00 a.m.** on Tuesday.
